TERMS AND CONDITIONS OF SALE

PRICES: This price list cancels all previous quotations and the prices quoted herein are subject to change without notice. All quotations are for immediate acceptance and subject to stock being unsold.

TERMS: Cash with order.

TRANSPORTATION: Customer assumes all costs and risks of transportation. You may specify method you prefer, or leave the choice to us. Only bare-root plants can be shipped by parcel post. On parcel post orders, please include adequate postage. We will refund any amount not used. On express or motor freight shipments, charges are collect, unless otherwise arranged. You may estimate cost by using the following approximate weights: Quart—2 lbs.; gallon—6 lbs.; 2-gal.—12 lbs.; 4-gal.—25 lbs.; 1-1½'—20 lbs.; 1½-2'—30 lbs.; 2-3'—40 lbs.; 3-4'—75 lbs.; 4-5'—125 lbs.

CLAIMS: All claims (except for errors in labelling) must be made on receipt of plants. We shall be glad to rectify any mistake made by us, but it is agreed that in no instance will our liability be more than the price of the plant.

GUARANTEE: All plants are guaranteed to be true to name and in good condition when they leave the nursery. We cannot, however, guarantee them to live, or flower, or guarantee them in any other way. Certain Camellia varieties when grafted sometimes bloom variegated even though the parent is not variegated, and for this reason we cannot guarantee grafted Camellias to be true to color in this respect.

PACKING CHARGE— We require a 50c packing charge on orders totalling less than \$4.00.

QUANTITY ORDERS

AZALEAS: You may order 5 and 50 of **one size and variety** at the 10 and 100 prices respectively. Varieties or sizes may **not** be combined to compute the lowest price.

CAMELLIAS AND ORNAMENTALS: We offer the following reductions in **bare-root prices only:** If you order 5 or more of the **same size and variety**, deduct 10c per plant; if you order 50 or more of the **Same size and variety**, deduct 15c per plant.

CONTAINER GROWN PLANTS

Perhaps you never thought you would see the day when plants were sold by the gallon! You will notice that we are listing 2-gallon and 4-gallon sizes this year for the first time. These terms used by nurserymen are not accurate with regard to the liquid content of the containers. The quart, gallon, 2-gallon, and 4-gallon cans are 3, 6, 7½, and 9 inches in diameter at the top respectively.

All plants listed by us this year in container sizes have been growing in the containers in which shipped for at least the current growing season, unless stated differently on the tag on each plant. The sizes shown (5-10", 10-15", 15-20", 20-25") are minimum heights, and many plants will be taller than indicated.

ACCOMODATIONS: On U. S. 90, within a few minutes driving from our nursery, are several hundred new motor court rooms including some of the best accomodations in the country. Facilities have expanded so rapidly that visitors seldom if ever fail to find a vacancy.

CUTTINGS AND SCIONS

CAMELLIAS: For many years, we have made a business of selling unrooted Camellia cuttings and scions. If interested, write for our current list.

HOW TO START A COLLECTION

Are you baffled by all the variety names and synonyms of Camellias? Then let us help you select varieties to start with—varieties we ourselves would select if we were starting over. We recommend strongly the one-gallon size as a starter. These plants are large enough usually to have bloom buds, and if you leave the selection up to us we will pick varieties with buds. If you prefer, you may specify varieties from the list below, and we will do our best to send budded plants.

VARIETIES TO START A COLLECTION

PINK: Debutante, Kumasaka, Lady Clare, Rosea Superba, Thelma Dale.

RED: Arejishi, Glen 40, Mathotiana, Prof. Sargent, Victor Emmanuel.

WHITE: Alba Plena, Queen Bessie, Sept. Morn, Victory White, White Empress.

VARIEGATED: Elegans Var., Mathotiana Var., Mikenjaku, Oniji, Rosea Superba Var.

STARTING COLLECTION. Four beautiful varieties in one-gallon cans, selected for vigorous growth, excellence of blooms, and minimum need for special care.

Four Plants for _____ **\$5.00**

COLLECTION FOR COLDER AREAS

In the "fringe" areas where people are now experimenting with Camellias outdoors—even as far north as Long Island—it is well to get varieties that have shown resistance to cold. Write for our Camellia Culture leaflet, with hints on protecting Camellias in outdoor plantings. Of course if your plants are in containers, and can be moved inside during cold periods, then you should ignore the list below.

The following varieties show promise of being hardy—both the bushes and the bloom buds—and are recommended for colder areas:

PINK: Berenice Boddy, Blush Hibiscus, Kumasaka, Lady Clare, Marjorie Magnificent, Rainy Sun.

RED: Adolphe Audusson, Blood of China, Gov. Mouton, Sgt. Barrios.

WHITE: Mrs. Chas. Simons, White Queen.

VARIEGATED: Adolphe Audusson Var., Elegans Var., Finlandia Var., Oniji, Tricolor, Ville de Nantes.

COLD WEATHER COLLECTION: Four Camellia varieties in one-gallon cans, especially selected for colder climates. You may specify varieties or colors, or leave selection to us.

Four Plants for _____ **\$7.95**

All plants in the above collections will be individually labeled and are guaranteed true to name

(Shipment by Railway Express only. If you wish to prepay charges—as for a gift order—allow about \$2.50 for a 400-mile shipment of four one-gallon plants, \$3.50 for a 1000-mile shipment. We will refund any overage.)

CAMELLIAS

Camellias are just beginning to approach their deserved place in the horticultural world, and certainly they belong with Orchids and Roses in the top echelon of blooms which are prized for outstanding individual beauty. Two added characteristics of Camellias place them at the very pinnacle among ornamental plants. These are, first, the lustrous evergreen beauty of the plants themselves, in either a landscape setting or in a container, and secondly, the winter-blooming habit which provides outdoor or conservatory blooms at a time when most other flowering shrubs have no blooms. Camellias cannot be adequately described in words. They have to be seen to be believed.

By selecting the proper varieties, the Camellia grower may have blooms in his garden or greenhouse from late August to early April. We have indicated the approximate blooming time for each variety listed below by the use of the symbols **E**, **M**, and **L** for early, mid-season, and late. In general, early varieties bloom before Christmas, midseason varieties from Christmas to early February, and late varieties in February and March in this area. Of course there is much overlapping, and we have marked some varieties with two symbols to indicate this. In some seasons blooms come sooner or later than their normal blooming times.

CAMELLIA JAPONICA

The species of Camellia most widely grown for ornamental purposes is **Camellia japonica**. Known in the Old South for many years as "Japonicas," plants of this species, like all the others, are native to the Orient and came to Western gardens by way of China and Japan.

DESCRIPTION OF VARIETIES

Since we are listing well over 300 varieties this year, we are not attempting to describe all of them in this catalog. Collectors may refer to **The Camellia: Its Culture and Nomenclature**, 1956 Edition, published by The Southern California Camellia Society, for descriptions of over 2000 known varieties, and containing extensive cross-referencing of synonyms. We can supply copies of this illustrated, 104-page booklet for \$1.50 each postpaid. Listed below are descriptions of about 75 of the best proven varieties.

ADOLPHE AUDUSSON. (M). Very large semi-double Red, petals heavy and folded, sometimes mixed with stamens. Large, dark green leaves, vigorous growth.

ADOLPHE AUDUSSON VAR. (M). Same as above, strikingly marked with White.

ALBA PLENA. (EM). Large, Snow-White formal double, blooming from October through January, and one of the oldest and most outstanding Camellia varieties. Indeed, it is the classic white Camellia, and is unexcelled as a corsage flower. Plants are vigorous, with bright green leaves usually variegated yellow on the last growth of the season. **ALBA PLENA** plants have a reputation of being hurt by severe cold and we advise persons whose plantings are subjected to severe cold to take precautions.

PRICES BEGIN ON PAGE 9

AREJISHI (ALOHA). (Very E). Irregular double with large outer petals framing numerous central petaloids. September blooms are light, later becoming Dark Red.

BEAU HARP. (M). Very large, Bright Red peony form. Vigorous, upright growth with large, dark green leaves. This new variety has been much in demand. For variegated form see DR. JOHN D. BELL.

BERENICE BODDY. (M). Light Pink with deep Pink underpetals. Medium large, semi-double. Vigorous, upright growth.

BETTY SHEFFIELD. (M). White striped and blotched Red and Pink. Large, semi-double to loose peony form with stamens mixed in slightly waved petals.

BLOOD OF CHINA (VICTOR EMMANUEL). (L). Large semi-double to loose peony Salmon Red. Very late. Compact, spreading growth.

BLUSH HIBISCUS. (M). Large single to semi-double. White with Blush Pink center. Large, dark green leaves.

CHARLOTTE BRADFORD. (M-L). Phlox Pink variegated White. Sport of MRS. BALDWIN WOOD. (One of the trio which includes MRS. BALDWIN WOOD and THELMA DALE.) Large, irregular semi-double to rose form double. CARLOTTE BRADFORD was adjudged the best flower at the 1954 show of the Men's Camellia Club of Birmingham.

CLAUDIA PHELPS. (M). A beautiful Pink sport of DUCHESS OF SUTHERLAND, shading to White toward the outer edge and sometimes splashed White.

C. M. HOVEY (COL. FIREY). (L). Not to be confused with MATHOTIANA VAR., which was formerly sold under this name, this is a large, flat formal double. Dark Red. Growth is rather slow.

C. M. WILSON. (M). This sport of ELEGANS is a beautiful Silvery Pink, paling toward the edges to blush Pink and White. The Pink color is similar to that of HIGH HAT, and the Golden anthers against this background make a picture that is unbelievably beautiful.

One-gallon Camellia. This is the ideal size for express shipment, four plants to a carton. See page 2 for collections of this size.

Camellia DAIKAGURA

DAIKAGURA (KIYOSU). (Very E). Variegated. Frequently begins blooming as early as August, but usually starts in September or early October. Flowers are highly variable, shading from Pink to deep Red with tinges of Purple, and from loose peony type to imbricated rose form double resembling MATHOTIANA. This, the regular DAIKAGURA, is splotched with White. Other members of this family include DAIKAGURA RED, HIGH HAT, and DAIKAGURA—WARD STRAIN.

DAIKAGURA RED. (Very E). Solid colored sport of DAIKAGURA.

DAIKAGURA — WARD STRAIN. (Very E). A selected strain of DAIKAGURA, with unusually large amount of beautiful marbled White variegations.

DEBUTANTE. (E-M). Beautiful Soft Pink, large full peony form. Vigorous, upright growth. Outstanding as a corsage flower.

DONCKELARI. (M). Head of a distinguished family, whose variations include VILLE DE NANTES, LADY KAY, and others. DONCKELARI is Red marked White in varying degrees. Slow, bushy growth. We have not been very successful with own-root plants.

DONCKELARI — TEA GARDEN STRAIN. (M). This form is beautifully marbled with more White than the regular DONCKELARI.

DR. JOHN D. BELL. (M). Variegated from of BEAU HARP. Very large semi-double, Bright Red marked with White.

DR. TINSLEY. (M). Very Pale Pink at base shading to Deeper Pink at edge with reverse side Flesh Pink. Medium semi-double shaped like a wild rose. Upright, compact growth.

PRICES BEGIN ON PAGE 9

DUCHESS OF SUTHERLAND. (M). White, sometimes with Pink stripe on one petal. Large, flat semi-double, sometimes with curled inner petals. Vigorous, upright spreading growth. Among the many sports of this variety are RUTH ROYER, CLAUDIA PHELPS, and DUCHESS OF COVINGTON.

ELEANOR HAGOOD. (L). Pale Pink, medium to large formal double.

ELEGANS (Pink). (E-M). The original ELEGANS was solid Pink so the variegated form should be designated ELEGANS VAR. Specify pink or variegated when ordering to prevent confusion. See description below.

ELEGANS VAR. (E-M). Very large variegated, peony-form blooms that are truly "elegant." Varies, with some blooms Solid Pink, others splotted with White. Form varies from tight peony flowers having many hundreds of tiny petaloids, to a loose peony form revealing yellow stamens.

ELIZABETH LE BEY. (M). Light Rose Pink, large hemispherical full peony form, with large petals and stamens intermixed with large petaloids standing erect. Vigorous pendulous growth.

EMPEROR OF RUSSIA. (M). Scarlet, large multi-center peony form. Upright, compact growth, with very large, dark green leaves.

EMPEROR OF RUSSIA VAR. (ASPASIA). (M). Scarlet, blotched with White.

ETHEL DAVIS. (M). Clear Pink, large, loose peony form. Much sought after.

FINLANDIA VAR. (MARGARET JACK). (E-M). White streaked with Crimson, large semi-double with swirled and fluted petals. One of the outstanding variegated Camellias.

FLAME. (M). Deep Flame Red, large semi-double. Vigorous, upright, compact growth.

FLOWERWOOD. (M). (Plant Patent No. 1004.) A beautiful fimbriated sport of MATHOTIANA.

GLEN 40. (M-L). Large deep Red formal to Rose form double. An outstanding variety. Slow, compact growth.

GOV. MOUTON (AUNT JETTY). (M). Oriental Red, large semi-double to loose peony, sometimes blotched with White. Open, willowy growth.

HERME (JORDAN'S PRIDE). (M). Large semi-double Pink, with irregular White border and streaks of Deep Pink. Upright growth. There are many beautiful sports of HERME, including BEAUTY OF HOLLAND, LOOK-AWAY, and SPRING SONNET.

HIGH HAT. (Very E). A beautiful sport of DAIKAGURA with flowers a delicate Silvery Pink. It has the same variation in form from loose peony to formal double as its parent.

IMPERATOR (FRENCH). (M). Dark Red, very large peony form. Upright, open growth, with distinctive large, round leaves.

IWANE. (M). Rose Red mottled White. Large, semi-double. Slow, compact growth.

KIKUTOJI. (E). Formal double, Deep Red blotched White. Rather small, and ideal for corsage or boutonniere purposes. Vigorous, bushy growth.

PRICES BEGIN ON PAGE 9

- KUMASAKA.** (M-L). Large rose form double to peony form, Rose Pink. Very dependable flowering variety.
- LADY CLARE (EMPRESS).** (M). Very large semi-double, Deep Pink. Large, dark green leaves. Compact spreading growth.
- LALLAROOK (LAUREL LEAF).** (M-L). Large, regular double, with petals curved inward at edges. Color varies from Light Salmon Pink to Deep Rose, frequently blotched with White. Narrow, pointed leaves, deeply veined.
- LA PEPPERMINT.** (M-L). Formal double, White, striped Light Rose, some flowers Solid Rose color. This variety may be the true MRS. ABBY WILDER.
- LEUCANTHA.** (M-L). Semi-double White. Vigorous upright growth.
- MAGNOLIAEFLORA.** (M). Exquisite semi-double Blush Pink, with two rows of petals opening in a cupped pattern, each petal concave. Slow growth.
- MATHOTIANA (PURPLE DAWN, MATHOTIANA RUBRA, PURPLE EMPEROR).** (M-L). Very large rose-form double, sometimes showing stamens. Flower is Deep Red, outer edge of petals turning Purple as the flower gets older. An outstanding corsage flower.
- MATHOTIANA SUPREME.** (M-L). A sport of MATHOTIANA, with stamens interspersed among the petals.
- MATHOTIANA VAR. (C. M. HOVEY).** (M-L). MATHOTIANA as described above, marked in varying degrees with White.
- MRS. BALDWIN WOOD (THUNDERHEAD).** (M-L). Head of a distinguished family which includes THELMA DALE and CHARLOTTE BRADFORD. All have large, irregular semi-double to rose form double blooms of outstanding texture and form. MRS. BALDWIN WOOD is White, with usually only one petal touched or striped with Phlox Pink; THELMA DALE is the solid Phlox Pink sport, and CHARLOTTE BRADFORD is Phlox Pink variegated White.
- MRS. CHAS. COBB.** (E-M). Large peony, Dark Crimson with Golden stamens. One of the darkest colored Red Camellia varieties. Lush, dense foliage.
- MRS. CHAS. SIMONS.** (M-L). Large to very large White blooms, varying from semi-double to loose peony form. Very vigorous, compact spreading growth, light green foliage.
- NINA AVERY.** (M). Semi-double to peony form, with crinkled, erect central petals irregularly mixed with White stamens, tipped Light Brown. White, washed Rose Pink.
- ONIJI. (LADY CLARE VAR.).** (M). The large, semi-double Deep Pink LADY CLARE beautifully variegated White.
- PINK PERFECTION (FRAU MINNA SEIDEL).** (E-L). Perfect double blooms of Clear Shell Pink, flowering profusely from November through March. This is one of the most widely popular Camellia varieties.
- RAINY SUN.** (M). Large Rose Pink, loose semi-double with feather-edged petals, and narrow serrated leaves.
- ROSEA SUPERBA.** (M-L). Truly "superb," this is a Pink sport of MATHOTIANA. Very large rose form double. Vigorous, compact, upright growth.

PRICES BEGIN ON PAGE 9

ROSEA SUPERBA VAR. (M-L). Marked in varying degrees with White.

ROSE DAWN. (E-L). Medium large rose form double to regular double, Deep Rose Pink, blooming freely even when young. We have blooms from November through March.

SEPTEMBER MORN (YOHEI-HAKU). (Very E). Large formal double to peony form, White, with outer petals frequently tinted in a Light Pink blush. Medium, spreading growth.

SERGEANT BARRIOS, (M). Very large semi-double Rose Red. Vigorous, upright growth.

THELMA DALE. (M-L). Outstanding Pink sport of MRS. BALDWIN WOOD. Large irregular semi-double to loose peony to rose form double, of a beautiful delicate Phlox Pink color. (The variegated form of this Solid Pink sport is CHARLOTTE BRADFORD.) Adjudged the best flower at the 1954 shows in Covington, Gulfport, and Jackson.

TRICOLOR. (L). Beautiful semi-double blooms, White striped Red, some all Red, others nearly solid White. Growth habits of LEUCANTHA.

WHITE EMPRESS. (E-M). One of the best of the informal Whites, with large petals of good texture, somewhat twisted, one or two mixed through the central stamens. Very large semi-double, with fluted petals. Vigorous, compact, upright growth.

WHITE QUEEN. (E-M). Large semi-double White, with rather small and pointed petals. Vigorous, compact, upright growth.

VICTORY WHITE. (M). One of the best Whites. Large semi-peony form, with central mass of mixed stamens and petaloids. Vigorous, upright, open growth.

VILLE DE NANTES. (M). Still the most popular and outstanding show-flower of all Camellias. Large semi-double, with some petals often partially or wholly fimbriated, some petals Deep Red and others often almost entirely White. Inner petals are often creped, with center petals in some flowers standing upright to resemble rabbit ears. Blooms vary greatly—even on the same bush. Received twice as many first prizes in the 1954 shows as the next contender. Slow, compact growth. (LADY KAY is a sport of this variety).

CAMELLIA SASANQUA

PRICES ON PAGE 21

CLEOPATRA. (E). Rose Pink semi-double to peony. Compact, upright growth.

MINE-NO-YUKI (SNOW ON THE MOUNTAIN) (E). Medium large double White, some in shape of a carnation, others occasionally formal. Rapid, spreading growth.

SHISHI-GASHIRA (E). A fine new dwarf Sasanqua. Dark Crimson Red, semi-double to double. Compact, slow growth.

SHOWA-NO-SAKAE (E). Loose peony to irregular double type bloom. Soft Pink, with some White variegation. Dwarf in growth.

Coniferous Evergreens

Casuarina cunninghamiana (Australian Pine). (30°).

Gal. (4-5' height): \$1.25.

Cedrus deodara. A handsome, evergreen small tree, with bluish, graceful branches, and slender trunk that seldom stands quite erect.

Quart: \$.60 Gal.: \$1.25

Cunninghamia lanceolata. This tall-growing blue Chinese fir, sometimes called Monkey Pine, is seen along the main streets of Jackson, Alabama, and other towns near the Gulf Coast. It grows tall, very erect, and the branches are horizontal with sharply tipped foliage. The main stem does not appear immediately, and young plants are sometimes of rambling growth.

Quart: \$.60 Gal.: \$1.25 4-gal.: \$4.50

Cupressus arizonica (Arizona cypress). (-5°). A promising species for Christmas trees in the South.

Gal.: \$1.00

Juniperus chinensis Pfitzeriana (Pfitzer's Juniper). Compact, dwarf spreading Juniper, very popular.

Quart: \$.60 Gal.: \$1.25

Juniperus chinensis Pfitzeriana compacta (Nick's Compact Pfitzer).

Quart: \$.60 Gal.: \$1.25

Juniperus chinensis Pfitzeriana glauca. (Blue-leaf Pfitzer). The bluish foliage on this type of Pfitzer makes it especially attractive.

Quart: \$.60 Gal.: \$1.25

Juniperus chinensis Femina. (Sylvestris Juniper). An attractive Juniper of pyramid shape, very hardy.

Quart: \$.60 Gal.: \$1.25 4-gal.: \$3.50

Juniperus communis Kiyonoi. A compact and columnar form of English juniper, very tall and slender.

6-8" bare-root: \$.40 Quart: \$.60 Gal.: \$1.25

Pinus caribaea. (Slash Pine). Fastest-growing of the Southern Pines, and well suited for the coastal region. If your lot is bare, Pines will quickly provide shade and color.

Gal.: \$1.00 4-gal.: \$3.50

Pinus palustris. (Longleaf Pine.)

Gal.: \$1.25 4-gal. \$3.50

Podocarpus sinensis. (Japanese Yew). One of the largest-leaved conifers with leaves 3" long and a quarter-inch wide. Looks like a broad-leaved evergreen. Excellent for hedges, screens, specimens, or for the shrubbery border. Can be pruned to any desired shape. Will do well in both sun and shade.

6- 8" bare-root: \$.35 Quart: \$.45 Gal.: \$1.00

18-24" B&B: \$2.50 2-3' B&B: \$3.50

Deciduous Trees and Shrubs

Albizzia julibrissin. (Silk Tree, "Mimosa"). Seen all over the South, this tree with feathery foliage and tips of pink flowers is indeed a sight in May and June. Hardy to Washington.

Gal.: \$1.25 4-gal.: \$3.00

Chionanthus virginicus. (Fringe-tree, "Granddaddy's Gray Beard"). After the Azaleas have finished blooming this tree bursts out in its white fringe-like blooms.

Quart: \$.60 Gal.: \$1.25.

Cornus florida. (Dogwood). Ever-popular single white Dogwood.

2-gal.: \$2.50

Hydrangea. Presumably the species **macrophylla**, the plants bear large clusters of pink or blue flowers, depending on the soil reaction. Acid soils produce blue flowers.

3" cans— \$.40 4-gal.: \$3.00

ORIENTAL MAGNOLIAS

Magnolia denudata. (Conspicua). Pure white oriental magnolia, flowers very large, measuring 6 to 8 inches, saucer shape.

	Each
3-4' graft	\$7.50

Magnolia soulangeana. (Saucer Magnolia, "Tulip Tree"). Flowers purplish pink, saucer shaped.

12-18" bare-root: \$.60 Gal.: \$1.00 4-gal.: \$3.00

EXPLANATION OF SYMBOLS

(S). Indicates a species that prefers shade.

(ss). Indicates a species about equally at home in sun or shade.

The **minimum temperature** the plant is apt to survive without damage is shown in parentheses for many species. These are approximate only, as many other conditions contribute to cold damage. Very early or very late freezes are often injurious to otherwise hardy species.

ORDERING PLANTS IN CANS

It is not practical to ship plants growing in cans by parcel post. If you live beyond the Railway Express delivery limits, we recommend that you drive in to the Express office and pick up your plants. If you cannot do this, we will fill your orders for container plants to be shipped parcel post by removing plants from cans and shaking most of the soil off the roots before packing.

Our cartons for shipping canned plants hold nine quart cans, four one-gallon cans, or one four-gallon can. By ordering in these multiples when shipment is by Railway Express, there will be a saving in weight and bulk.

AZALEAS

Azaleas fall under the generic head **Rhododendron** and are cousins of the "true" Rhododendron. There are many different kinds. Some are suitable only to the lower South, while others are hardy as far north as the New England states. They comprise many different types of growing habits, ranging from the slower growing Kurumes often called "dwarf" Azaleas, to the Hardy Japanese and Indica types which sometimes attain a height of 10 to 12 feet. The hardiness of each type, and its growing habits are discussed under individual group headings.

INDICA AZALEAS

The **Indica Azalea** blooms are very large and single and the varieties presented here offer a wide range of colors. Indica Azaleas will exist in soils which are not as well drained as demanded by Kurumes but they will do better in well-drained soils. They are at home in the acid coastal soils and there are bushes over one hundred years old in Mobile, Charleston, and other coastal areas, with a spread of more than 25 feet in diameter. They are doing well apparantly without any special attention, and are a living illustration of how perfectly at home they are in the coastal areas of the South. Many people are starting to try Indica Azaleas in areas which have much lower temperatures.

ELEGANS. (Very E). Light pink. Upright and fast grower. Earliest of our well-known Indica varieties. 8-12", 12-18", 18-24", 2-3'.

FIELDER'S WHITE. (E-M). These early, white blossoms provide an effective contrast to other varieties in group plantings. The compact growth and large flowers make it one of the best whites. All sizes.

FISHER'S PINK. (M). This light pink variety blooms rather later than ELEGANS, providing a light-colored bloom to blend with the PRIDE OF MOBILE. All sizes.

FORMOSA. (M). This vigorous and hardy grower, with its large, purple-rose flowers and dark leaves, is a favorite for background and screen plantings. All sizes

GEORGE L. TABOR. (M). The flesh pink blooms with their delicate deep pink markings make this hardy, fast-growing, mid-season bloomer outstanding among the newer varieties. All sizes through 18-24".

INDICA ALBA. (M). Inclined toward upright growth, the pure white flowers in mid-season are striking against the dull colored hairy foliage. Hardy. All sizes through 8-12".

LAVENDER LIGHT. (Very E). An early blooming variety, this kind has a more delicately colored lilac bloom than ELEGANS, but otherwise is similar. All sizes.

PRESIDENT CLAY. (E-M). Orange red, with good upright growth. All sizes through 12-18".

PRIDE OF DORKING. (L). These clustering, deep wine red blossoms provide a new thrill late in the season. A slow grower, it is not one of the hardiest. 1-yr.

PRIDE OF MOBILE. (M). This practically perfect mid-season bloomer, with its mass of deep, watermelon pink flowers, and hardy, fast compact growth, defies adequate description. Originally called **ELEGANS SUPERBA**. All sizes.

PRINCE OF ORANGE. (M-L). A low, very bushy grower, this mid-season to late bloomer is a nice shrub even without its exotic, deep orange-red flowers. All sizes

SALMON. (**LAWSAL**, **DAPHNE SALMON**, **PRIDE OF SUMMERVILLE**). (M). This hardy, rather slow grower is very popular with its mid-season salmon-colored blooms. 1-yr., 2-yr., 8-12", 12-18".

SOUTHERN CHARM. (**JUDGE SOLOMON**). (M). An excellent newer variety, with deep pink blooms. It is a sport of **FORMOSA** and has the same excellent growth habits. All sizes through 18-24".

HARDY JAPANESE AZALEAS

This group of **Kaempferi**, **Macrantha**, and other hardy Azaleas can be grown over a large part of the United States, being very much at home in New England where some are deciduous. They are relatively fast growers and are a match for the Southern Indicas in size and showiness. Blooms are large and the foliage is small and glossy dark green, making the plants most desirable for landscaping.

FLAME. (E). Fast, upright grower, with bright orange-red single flowers. Actually a **Kurume** variety, but placed in this group because of its growth habit. 1-yr.

KAEMPFERI. (L). Evergreen in the South, this Azalea loses its leaves farther North. It has large, single red flowers. Hardy to Massachusetts. 1-yr., 2-yr., 8-12", 12-18".

LILACINA. (M). Very delicate lilac color, with delightful fragrance and good growth, hairy leaves. All sizes to 12-18".

MACRANTHA DOUBLE. (L). Large, clear pink double flowers. The **Macrantha** varieties are very late, extending the Azalea season in this area to May and June. All sizes to 18-24".

MACRANTHA ORANGE. (L). Similiar to above, with orange-red single flowers and slow, dwarf growth. Note that this variety sells at same prices as **Kurumes**. 1-yr., 4-6", 6-8", 8-10".

MAXWELLI. (M-L). This variety is the equal of the Indicas in dense growth habit and large size blooms, yet is much hardier. Carmine-red single flowers. All sizes to 18-24".

PRICES OF INDICA AND HARDY JAPANESE GROUPS (Except **Macrantha orange**, which sells at **Kurume** prices)

BELTSVILLE AZALEAS

This group of Azaleas, developed at the United States Department of Agriculture experiment station at Beltsville, Maryland, is one which shows great promise toward broadening the selection of kinds to those in the colder areas, and we are offering three varieties for sale this year for the first time. We have ten others which we hope to offer in the next year or so. Descriptions are from U.S.D.A. releases.

H. H. HUME (No. 224). This is a hybrid obtained from the cross INDICA ALBA x SNOW. The plant is moderately branched, erect-spreading with foliage partially persistent, depending on temperatures encountered. Flowers are white, with a faintly yellowish throat, hose-in-hose; and are considerably larger than SNOW, being 2 inches across. They are borne 2 to 5 per cluster. Hardy in New England and making an especially fine plant in the South, Southeast, and in California. It is also acceptable as a greenhouse forcing variety. All sizes through 18-24".

ROSE BANNER. (No. 126). This variety was obtained from crossing KAEMPFERI x SNOW. Open growth, with spread about equal to height. Foliage very similar to SNOW. Flowers are hose-in-hose, about 1½ inches across, rose colored, with dark pink spots in the throat. It has proved to be as hardy as its parents. 1-yr., 8-12".

WHITE BANNER. (No. 136). This variety is a sister seedling to ROSE BANNER. Plant is vigorous, with a tendency toward producing a low-spreading growth, often being only half as tall as broad. Foliage very similar to SNOW, but larger. Flowers are hose-in-hose, about 1-1¼ inches across. White with a faint yellowish tinge in the throat. 1-yr., 12-18".

BELTSVILLE AZALEAS PRICED SAME AS INDICAS

KURUME AZALEAS

Kurume Azaleas are slow growing, sometimes called "dwarf," and are often seen in borders along walks and in planting around or in front of larger Azaleas, in rock gardens, and in beds. They are adapted to a great variety of uses. Kurumes will eventually reach a height of 4 to 6 feet, however, unless kept pruned back. They are hardy all over the South and as far north as New Jersey and Long Island. Extensively used by florists as pot plants, and in the North they bloom for them at Easter time. The individual blooms are small in comparison to the individual blooms of the Indicas, but the Kurume blooms are borne in greater profusion and in clusters. Some blooms are single, while others have two rows of petals and are described as "hose-in-hose." You will note the wide range of colors.

CHRISTMAS CHEER. (E-M). Small, bright red hose-in-hose blooms; compact growth. All sizes through 10-12".

CORAL BELLS. (M). Dainty hose-in-hose coral pink blooms, shading deeper toward center. Small, glossy leaves, vigorous growth. All sizes.

DOUBLE MAUVE. (M-L). Mauve is a delicate shade of violet or lilac. Beautiful hose-in-hose blooms cover entire plant. 1-yr., 2-yr., 4-6".

HEXE. (M). Deep crimson red hose-in-hose blooms, somewhat larger than CHRISTMAS CHEER. Compact growth. Probably a Kurume hybrid. All sizes.

- HEXE DE SEFFELAERE.** (M). A Belgian hybrid variety (Prof. Wolters x Hexe), it is an improved type of HEXE with perhaps more vigorous and upright growth. 1-yr., 6-8" 8-10".
- HIAWATHA.** (M). Crimson-carmine, perhaps not strictly a Kurume, but similar in growth. Beautiful hose-in-hose blooms, 1-yr.
- HINO CRIMSON.** (M). Similiar to HINODEGIRI, with very rapid growth. 1-yr.
- HINODEGIRI.** (M). One of the most popular reds. Very compact grower and covers itself with showy bright red single blooms. One of the most sought after for pot plants and borders. All sizes.
- HORTENSIA.** (M). Large hose-in-hose soft pink blooms, produced in large trusses. 1-yr.
- PEACH BLOW.** Fast grower, with medium size single flowers of delicate peach pink shade. 1-yr., 4-6", 6-8", 8-10".
- PINK PEARL.** (M). Salmon-rose shading lighter toward center. Large hose-in-hose blooms, produced in clusters. Rapid growth. 1-yr., 2-yr.
- SALMON BEAUTY.** (M). Large hose-in-hose salmon pink blooms, with large, glossy light green leaves. Compact growth All sizes.
- SALMON QUEEN.** Fast grower, with medium size single flowers of delicate peach pink shade. 1-yr., 4-6", 6-8", 8-10".
- SNOW.** (M). Pure white hosen-in-hose blooms in clusters. Good size glossy leaves, low compact growth. All sizes.

PERICAT AZALEAS

Very similar to the Kurume Azaleas, the Pericats are rapidly growing in popularity. The partially open buds present a very distinct and different appearance, like that of a miniature rose. All varieties are compact, vigorous, and hardy. They are used in every way that the Kurumes are used, and in addition to the spread of climate which the Kurumes will take, the Pericats seem to be doing nicely as far south as southern Florida.

GARDENIA SUPREME. (M). White. hose-in-hose, formed like a small gardenia. Dark green foliage, vigorous growth. All sizes.

MME. PERICAT. (L). Large flesh pink, hose-in-hose, rapid growth. 1-yr., 2-yr., 4-6", 6-8".

SWEETHEART SUPREME. Blush pink, the shade of a sweetheart rose, hose-in-hose blooms and large, rounded, dark green leaves; compact growth. All sizes

Scene in Bellingrath Gardens

VISIT MOBILE

We are located on four-lane U. S. Highway 90, just $\frac{1}{4}$ -mile southwest of the new Mobile city limits, and 10 miles from Bankhead Tunnel in downtown Mobile. Visit our new Garden Center, opened in October 1956, and inspect our complete line of landscape materials, house plants, and garden accessories. We have many items not listed in this catalog. While in Mobile, there are many attractions nearby that will interest you:

BELLINGRATH GARDENS: Open the year round, this is the high spot of any visit to the South. Turn south from U. S. Highway 90 just four miles southwest of our nursery to reach Bellingrath Gardens.

DAUPHIN ISLAND: Continue south for 10 miles beyond Bellingrath Gardens to reach Alabama's new playground, opened in 1955 by the completion of a 4-mile overseas bridge. Rapidly expanding facilities will make Dauphin Island one of the best beach resorts on the Gulf of Mexico. Historic Fort Gaines, guarding the entrance to Mobile Bay, is an added attraction.

AZALEA TRAIL AND FESTIVAL: During February and March of each year, Mobile's Azalea Festival is staged, featuring the famous 20-mile Azalea Trail pageants, parades, guided tours of anti-bellum homes, and coinciding with Mobile's colorful Mardi Gras celebration, which is older than the one in New Orleans, and which rivals it in beauty and splendor.

Fatsia japonica and Ardisia crenulata in gallon cans.

PROTECTING PLANTS AND BLOOMS FROM COLD

Camellias and Azaleas may be grown in any cold climate if they are put in a greenhouse, sun porch, lighted cellar, room, cold frame or any other place which will give them adequate protection in cold weather. Camellias and Azaleas are widely grown in greenhouses in the northern portion of the United States. Where it is desired to move them outside during the growing season, they may be kept in containers. Plants growing out-of-doors can be given a great deal of protection from cold damage by planting them in a place where the sun will not strike them in the morning after a night of low temperature. A western or northern exposure is best in order to protect the plants from the morning sun. Additional protection can be afforded plants by erecting a framework over the plant and covering it with burlap or other material. Still additional protection may be given covered plants by placing a lighted electric bulb under the framework and cover.

LARGE SPECIMEN CAMELLIAS

We have over 200 varieties of large specimen Camellias from five to ten feet in height. These plants will provide at once a galaxy of blooms and massive landscape greenery, with no need to wait years and years for smaller ones to grow up. Plants are priced individually at the nursery. See them now.

**WE ARE OPEN SUNDAYS
OCTOBER THROUGH APRIL**

*WE WILL REFUND ALL POSTAGE NOT USED ON ORDERS OF BARE-ROOT PLANTS SHIPPED BY PARCEL POST

[illegible]

HOW FAR NORTH WILL AZALEAS AND CAMELLIAS GROW OUTDOORS?

We would not attempt to assign positive northern limits to the areas in which Azaleas and Camellias will grow outdoors, but we can make certain general observations, which may be helpful to persons contemplating the growing of these plants in areas they think might be too cold.

CAMELLIAS: Within the past few years, several of our customers have had some degree of success with varieties of *Camellia japonica* in outdoor plantings on Long Island and in New York City, Philadelphia, and Washington. There seems to be some evidence that certain *japonica* varieties might be harder than the *सान्क्वा*s, which is contrary to previous belief. We have listed a few varieties which seem harder on page 2 of this catalog, and will supply you with a more complete list on request. In general, we would not advise planting of the midseason or late "imbricated" or complete double types in colder areas outdoors. These varieties do not have stamens to cushion the effect of freezing and thawing of the bloom buds. As for the *सान्क्वा* varieties, we would suggest that Washington or Baltimore be assigned as the northern limit until further evidence has been compiled. The *रिक्कुलैटै*s are not suitable for outdoor planting except for the Florida peninsula and Southern California.

AZALEAS: Azaleas and other *Rhododendrons* comprise so many different types and species that no general rule can be given. Some varieties, mainly deciduous, are hardy even as far north as Canada. But we can indicate something of the hardiness of the groups which we are presently offering for sale. The **Hardy Japanese Azaleas** are the hardiest, and can be grown over a large part of the United States, being much at home in Massachusetts, where some are deciduous. The **Kurume Azaleas** are the next hardy, being grown outside as far north as Long Island on the coast, and inland perhaps to the Ohio River. The **Pericat Azaleas** are almost as hardy as the Kurume varieties as far as standing cold is concerned, and it has been found that they will grow farther south (southern Florida) and stand more hot weather than the Kurume Azaleas. The **Indica Azaleas** are less hardy than the above three groups, being able to take the winters of Tidewater Virginia or possibly Washington, D. C.

PROTECTING PLANTS AND BLOOMS FROM COLD

(see page 32)

WHEN SHOULD AZALEAS AND CAMELLIAS BE SET OUT?

Any plant may, strictly speaking, be "set out" or planted at any time of the year. The only time-restriction on moving plants is that there are certain plants which should not be dug during their period of active growth. In digging a plant many of the roots necessarily are cut, unless the ball is made so large that it includes all parts of the roots, which is not practical except in the case of a very small plant. Therefore, digging a plant will usually cut some of the roots. Should some of the roots be cut during the growing season, when the plant is depending upon its entire root system to keep it going, the plant will be shocked and set back to a greater or lesser degree, depending on the type of plant and the percentage of the root area pruned off. This loss of root area will retard the plant and in some cases even cause its death. Our container plants can of course be moved at any time even during the growing season.

CAMELLIAS are one of the plants for which it is advised not to dig them during their period of growth, which runs in this section from about April 1st to October 1st. However, they may be set out at any time, even while growing, if they were previously dug and burlapped or potted during the dormant period. Our practice is to carry a large selection of plants through the summer in burlap and in containers of various kinds, so that we can offer them for sale at any time of the year.

AZALEAS have particularly dense, compact root systems, and are very easy to move at any time of the year. However, during the hot summer months it is advisable to be a little more careful about watering newly set out plants and, if possible, to afford them some shade. Ordinary burlap tacked to 4 stakes will give them splendid protection from the hot sun.
